PROFESSIONAL SUMMARY

Business and technology analyst with an MS in Artificial Intelligence and Business Analytics, Raymond James operations experience, and applied AI project work. Reviewed \$10M+ in daily transactions, automated Excel workflows, supported users in technical environments, and built systems with Python, SQL, FastAPI, RAG, and structured testing.

EDUCATION

University of South Florida, Tampa, FL

MS Artificial Intelligence and Business Analytics

Aug 2024 - May 2026

GPA: 4.0/4.0

University of South Florida, St. Petersburg, FL

BS Business Management, Honors, Dean's List

Aug 2019 - Aug 2023

GPA: 3.98/4.0

SKILLS

Business and Operations: Business Analysis, Workflow Analysis, Process Improvement, Requirements Translation, Stakeholder Communication, User Support, Incident Documentation, Data Validation

Data and AI: SQL, Excel, Python, RAG, Multi-Agent Systems, Recommendation Systems, Risk Scoring, Splunk, Prometheus, Grafana

Technical Tools: FastAPI, PostgreSQL, SQLite, Docker, Streamlit, Azure OpenAI, Git, Postman, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

University of South Florida

Tampa, FL

Audio Visual Technician

Feb 2026 - May 2026

- Provided first-response classroom technology support for 12 learning spaces, troubleshooting issues with faculty and staff, documenting recurring incidents, and responding about 75% faster than the service level standard.

USF MUMA College of Business

Tampa, FL

Graduate Teaching Assistant, CGS 2100: Computers in Business

Aug 2024 - May 2025

- Supported 680+ students in Excel, PowerPoint, and Teams by reviewing work for accuracy and explaining business technology concepts, contributing to a ~25% increase in assignment completion.

Raymond James

St. Petersburg, FL

Managed Customer Accounts Associate

Nov 2023 - Aug 2024

- Reviewed \$10M+ in daily transactions for 100+ accounts, using internal systems to validate activity, investigate discrepancies, and document decisions based on established guidelines.
- Built an Excel workflow to group account activity and flag review thresholds, reducing manual review time by about 67% in the reconciliation process.

University of South Florida Housing

St. Petersburg, FL

Resident Assistant

Aug 2021 - Aug 2023

- Managed desk and on-call support for a 300+ resident community, handling requests, leading floor meetings, and escalating after-hours incidents, including lockouts, facility issues, and emergencies.

RELEVANT PROJECTS

Aug 2024 - May 2026

NuMe | Python, FastAPI, PostgreSQL, React

- Built a wellness app that combines wearable data, recipe parsing, risk scoring, and empathy checks to return explainable recommendations, with backend and frontend tests covering core workflows.

Nest | Python, SQL, FastAPI, SQLite

- Developed a household operations app used daily to manage finances, routines, tasks, and pet health, using FastAPI, SQLite, AI parsing, and advanced SQL for reporting and sync.

USF Concierge | Python, Splunk, Streamlit, PostgreSQL

- Created a university concierge system that routes student questions through chat, email, and calendar workflows, then added Splunk tracing to reduce response time from about 40 seconds to 15 seconds.

Homelab | Docker, Prometheus, Grafana, Linux

- Maintain a self-hosted platform with isolated Docker networks, monitoring, alerts, update routines, and documented access controls to keep personal services stable and easier to troubleshoot.

AWARDS & HONORS

USF Golden Bull Award, 2023 | USF MUMA 25 under 25 Honoree, 2023 | USFSP RA of the Year, 2022 | USFSP Chancellor's Leadership Council Award, 2019 – 2023 | USF Dean's List, 2019-2023 | USF Honors College, 2019-20
